RE: HiTec 3000

Dear Mr. Reilly:

It has come to my attention that the Environmental Protection Agency is considering permitting the use in this country of a gasoline performance additive known as HiTec 3000. It appears from the information I have seen that the additive seems to play a substantial role in reducing NOx emissions from automobiles.

As air pollution is a major concern to Kentucky and my area in particular, it is imperative that all options be thoroughly examined as quickly as possible. It is my hope that this additive be given prompt consideration by your agency.

I would also say that the Ethyl Corporation, which is promoting this additive, is a highly reputable company with a great deal of technical expertise. Their reputation leads me to believe that this product is sound and fully tested.

I would like to thank you in advance for your consideration in this matter.

Very truly yours,

A handwritten signature in cursive script that reads "Jim LeMaster". The signature is written in dark ink and is positioned above the printed name "Jim LeMaster".
